I. Read the passage and answer the questions given below.

(8)

We should find time to enjoy life as leisure time is equally important, but it is becoming difficult to find time for ourselves. Time is either utilised in doing never ending school work or it is often wasted in watching TV serials which takes us nowhere. It is said if you want any work to be done it. But the one who has hardly any work to do will not be able to complete the assigned task. It is the world's busiest people who are able develop exciting careers and still have leisure, as they are the best time managers.

Every minute has to be managed, hence do not crawl out of bed, instead charge out ! If you get up on time, half the battle is already won. Organise yourself. Twenty minutes, spent on organising and planning your schedule will save you an hour. Maintain a diary. You cannot remember everything. Note down the important things and let your mind be free for some creative ideas. Discourages friends who drop in to find out about homework, when they themselves were present in the class. Protect yourself from every minute stealing interruptions and you will accomplish the best.

When one period is over it is always wise to open any textbook or go through your notebook and check if you have done your correction work. Why waste time in making noise? Learn to work while waiting too. Making the best use of every moment doesn't mean pushing yourself relentlessly.

Breaking up your routine can help you to work faster and better. Exercise can also clear your mind and relax your body.

By simply managing your time efficiently, you will reap the full benefits. So get up and organise yourself as that is the key to success. Hard work alone cannot help!

Q-1 Why don't children find any time to enjoy?

Q-2 How can an hour be saved every day?

Q-3 Complete the line-

The 'busiest man' find leisure as

Everything cannot be remembered so we should _____.

An easy way to make maximum gain is _____.

Q-4 Give two benefits of exercise.

Q-5 Give another word which means as

a) disincline. b) unmercifully

Q-6 Give the antonym of

a) exciting - b) idle-

II Read the passage and answer the questions given below.

(7)

Most people do have several dreams every night as dreaming is a very natural action. Babies, in particular, spend a long time in the dreaming stage of sleep.

But only a quarter of us remember our dreams and those that do are only conscious of less than fifty percent of the dreams. Dreams are now generally recognised as an important function of overall health and well being.

It is particularly stressful to miss out on the dreaming stage of sleep. Dreams can also provide solution to problem _Elias Howe designed the sewing machine after a dream showed him the answer to a design problem. We are influenced in our dreaming by food. Most of us will be aware of the odd dreams we remember after a night of over eating.

Noise too, plays a major part in our choice of dreamy subject matter. Noises in the bedroom may not awake you, but they could certainly influence your dreams. The dreams we dread are nightmares. They often appear as a result of seeing disturbing films or horror shows.

Although we have plenty of theories, we have no definite answers on what dreams are and where they come from. More recently, the dreams are and where they come from. More recently, the dreams have been linked with hidden truths about the individual dreamer. It is often believed that dreams could be used to foretell the future. Correct interpretation of the dreams reveal a persons true feelings, their most basic and real desire. The interpretation of dreams is quiet controversial. This has led over the years to a closer study and analysis of the deeper meaning of dreams.

Q1 'Sweet Dreams to your eyelids '. Are the dreams always sweet? Why or why not?

Q2 'Dreams can provide solutions to your problems '. Give an example.

Q3 'The horror shows are exciting '. What is usually the effect of such shows?
