Time – 3 hrs.   M.M. 80

General Instructions:
1.All questions are compulsory.
2.You may attempt any section at a time.

Section A (Reading)
1.Read the passage carefully.

Pearls are formed from pearl oysters. They are part of a group of animals belonging to the group bivalvia.This include snails,slugs, etc.Pearls are grown in live oysters far below the surface of the sea. These oysters have a hard shell covering their body. In between the shell and its body there is an empty space called the mantle.
A natural pearl begins its life as a foreign object, such as a parasite or piece of shell that accidentally lodges itself inside the mantle from where it cannot be expelled . It causes some irritation to the oyster.To ease this irritant, the oyster's. body begins to secrete a smooth, hard crystalline substance around the irritant. This substance is called 'nacre'. As long as the irritant remains within its body,theosyter will continue to secrete nacre' around it, layer upon layer.
Over time, the irritant will be completely encased by the silky crystalline coatings. And the result is a lustrous pearl.Narce is composed of microscopic crystals if calcium carbonate, aligned perfectly with one another, so that light passing along the axis of one crystal is reflected by another to produce a rainbow of light and colour.

Answer the following questions briefly: 1×8=8
(1) What are pearl oysters?
(2) Which other animals belong to the group bivalvia?
(3) Where does the pearl live?
(4)How does a natural pearl begin its life?
(5) When is nacre' secreted ?
(6) What is Nacre' composed of ?
(7) How is the lustrous pearl formed?
(8) Pick out from the passage a word that means,"Reflecting light evenly and efficiently without glitter or sparkle".

2. Read the passage given below and answer the questions that follow by choosing the answers from the given options.   1×7=7

It is a matter of common knowledge that in underdeveloped countries like India with a growing population, there is an unusual pressure on land cultivation. Here, more people are engaged in agriculture partly or wholly that are necessary.
What is the result ? When more people are engaged in agriculture than are really needed for the purpose, they are really surplus.If they are withdrawn from the rural areas and put in other occupations and professions it will not mean any decrease in agricultural output. On the other hand, it might increase,as it is said,"
Too many cooks spoil the broth". In absolute terms the total volume of rural

employment is much larger than that of any other country. No wonder, it poses the most challenging problem for the planners to tackle.

(1) The main reason for unusual pressure on land in undeveloped countries is _
_____
(a) very low population.   (b) very high population (c) not very low population (d) not very high population

(2) In India many more people are engaged in agricultural than is _____
(a) demanded. (b) needed (c) expected (d) challenged

(3) "They are really surplus " means_____
(a) they are too many of them (b) they are really useless (c) they are really needed (d) they are a waste of time

(4) India has the largest number of_____
(a) unemployed persons in the urban areas (b) unemployed persons in the semi urban areas (c) unemployed persons in the planning department
(d) unemployed persons in the rural areas.

(5) The most challenging problem for the planners to tackle is _____
(a) To provide employment to the rural population (b) To provide employment to the urban population (c) to increase rural areas (d) to build dams in rural areas

Q.13. Adjacent sides of a rectangle are in the ratio of 5:12 and its perimeter is 34 cm. find its diagonals.

Q.14 The numerator of a fraction is 6 less than denominator. If 3 is added to numerator, the fraction is equal to $\frac{2}{3}$. Find original fraction.

Q.15. The diagonals of a rhombus are 7.5cm and 12cm .find its area?

Q.16. Solve: - $2^x + 2^x + 2^x = 192$, find the value of x?

Q.17. Find 10 rational numbers between $\frac{3}{5}$ and $\frac{3}{4}$?

Q.18. Simplify $\dfrac{25 \times t^{-4}}{5^{-3} \times 10 \times t^{-8}}$

Q.19. Find the measure of each exterior angle of a regular polygon of

   (i)   9 sides   (ii)   15 sides

Q.20. Evaluate - $5(3^{-1} \times 3^0 \times 3^{-1})$

<div align="center">

SECTION – D   (8X 4)

</div>

Q.21. (i) The interior angle of a regular polygon is four times its exterior angle .How many sides does the regular polygon have ?

(ii)Three angles of a quadrilateral are equal and its fourth angle is a right angle. Find the measure of each.

Q.22 (i) Find the volume of a cube, one face of which has an area of 64 m^2

    (ii) Find the value of $\sqrt[3]{216} \times \sqrt[3]{-27}$?

Q.23. There are 2401 students in a school .P.T Teachers wants them to stand in rows and columns such that the numbers of rows is equal to the number of columns. Find the number of rows?

Q.24. Present ages of Anu and Raj are in the ratio 4:5. Eight years from now, the ratio of their ages will be 5:6. Find their present ages.

Q.25 (a) Evaluate: $\sqrt[3]{\dfrac{-512}{343}}$

(b) Area of a square plot is 2304 m². Find the side of the square plot?

Q.26. In a quadrilateral ABCD, the angles A, B, C and D are in the ratio 1: 2: 3: 4. Find all angles

Q.2728 The ages of Rahul and Haroon are in the ratio 5:7. Four years later the sum of their ages will be 56 years. What are their present ages

Q.28. Write the name of quadrilaterals which have:

(a) both diagonals equal   (b) all sides equal   (c)one pair of opposite sides is equal

SECTION – E   **(5)**

Q.29.. Work out the value of each shape using simple arithmetic functions: (+) Plus (-) Minus (/) Division (x) Multiplication.

$$\frac{\hexagon}{3} + \frac{\blacksquare}{4} = 14$$

$$\hexagon - \blacksquare = \blacktriangle$$

$$\frac{\blacktriangle}{4} = \bigstar$$

Q.30. If South-East becomes North, North-East becomes West and so on. What will West   become?
